SIZE: 101 X 263 mm

LAXLO 120ml Syrup

لیکزلو
سیرپ

COMPOSITION:

Each 5ml contains:

Prune Juice Extract (MS) 100mg

Senna Leaf Extract (USP) 100mg

Foeniculum Vulgare Extract (USP) 50mg

PRODUCT DESCRIPTION:

LAXLO Syrup offers fast-acting and effective relief from occasional and chronic constipation. Its unique triple-action, plant-based formulation works synergistically to stimulate gastrointestinal motility, improve stool consistency, and alleviate abdominal bloating and discomfort. Crafted from natural ingredients, LAXLO is gentle on the digestive system, non-habit forming, and safe for long-term, making it an ideal solution for maintaining regular bowel health naturally.

PHARMACOLOGICAL CLASSIFICATION:

Herbal Laxative & Carminative

MECHANISM OF ACTION

Prune Juice Extract: Prune juice is a natural and gentle laxative derived from dried plums. It contains sorbitol, a sugar alcohol with osmotic activity, and dietary fiber that helps increase stool bulk and moisture. Sorbitol remains unabsorbed in the gut and draws water into the colonic lumen through osmotic pressure, this results in:

- Softening of stool consistency
- Increase in stool volume
- Stimulation of colonic motility
- Enhance fecal bulk
- Facilitate faster colonic transit time

Senna Leaf Extract: Senna is a traditional herbal medicine widely used to relieve occasional or short-term constipation. It is known for its gentle but effective laxative action, making it a common choice in natural digestive remedies.

The active ingredients in senna are called sennosides A & B. These are natural compounds that remain inactive until they reach the large intestine (colon). There, they are broken down by the natural bacteria (gut flora) into active substances that help stimulate the bowel.

Dual Action Mechanism:

Stimulates Bowel Movement (Peristalsis): The active compounds trigger the muscles in the colon wall to contract more frequently and strongly. This process, called peristalsis, helps push the stool forward through the colon, speeding up bowel movements.

Retains Water in the Colon: Senna also reduces water and electrolyte reabsorption from the colon. As a result, the stool remains soft and moist, making it easier and more comfortable to pass.

Foeniculum Vulgare Extract: Fennel is a traditional herb with laxative. It relaxes intestinal smooth muscles and promotes motility. Foeniculum vulgare contains bioactive constituents such as anethole, fenchone, and estragole, which exhibit multiple GI benefits:

- **Smooth muscle relaxant:** Inhibits intestinal spasms by antagonizing calcium influx in enteric smooth muscles
- **Carminative action:** Reduces gas formation by decreasing intestinal fermentation and facilitating gas expulsion
- **Anti-bloating effect:** Alleviates abdominal discomfort and fullness
- **Mild prokinetic activity:** May enhance gastric emptying and improve intestinal transit

THERAPEUTIC INDICATIONS

- Occasional & Functional Constipation
- Post-Antibiotic Bowel Irregularity
- Diet- or Lifestyle-Induced Constipation
- Travel-Associated Constipation (Travelers' Constipation)
- Constipation in Geriatric & Bedridden Patients
- Supportive Therapy in IBS-C (Irritable Bowel Syndrome – Constipation Predominant)

DOSAGE:

Children (05-12 Years): 10ml-15ml Daily

Adult: 15ml-30ml Daily

PRECAUTION:

Ensure adequate hydration during use

SIDE EFFECTS:

In some individuals, mild abdominal bloating or gas may occur, particularly due to natural fruit sugars like sorbitol (from prune extract).

Urine color may change slightly (yellow to reddish-brown), which is harmless and temporary.

DRUG INTERACTIONS:

No serious drug interactions are commonly reported with this combination.

INSTRUCTIONS:

Protect from light, heat and moisture.

Store below 25°C.

Keep out of the reach of children.

How Supplied:

Available 120ml in PET bottle.

ہدایات: ۲۵ ڈگری سینٹی گریڈ سے کم درجہ حرارت پر رکھیں۔

دھوپ اور گرمی سے بچائیں۔ بچوں کی پہنچ سے دور رکھیں۔
