

# CHIKOL

## Oral Liquid Drops

چیکول ڈرائپس

### COMPOSITION:

Each 10ml contains:  
Foeniculum vulgare Extract (USP)..... 100 mg  
Cuminum cyminum Extract (IP)..... 100 mg  
Mentha piperita Extract (USP)..... 100 mg  
Zingiber officinale Extract (IP)..... 50 mg  
Ptychosperma ajowan Extract (MS)..... 5 mg

### PHARMACOLOGICAL CLASS:

Carminatives, Antispasmodics, Digestive Stimulants (Herbal origin)

### PRODUCT DESCRIPTION:

**CHIKOL** Drops is a pediatric formulation containing plant extracts, specifically designed to relieve colic, abdominal cramps, bloating, and flatulence in infants and children. Additionally, it supports digestion and appetite, promoting healthy growth and development during early childhood.

### INDICATIONS:

**CHIKOL** Drops is indicated for the symptomatic relief of various gastrointestinal disturbances commonly observed in infants and young children. Its natural composition makes it a safe and effective option for routine pediatric use in the following conditions:

- Infantile colic
- Gastrointestinal discomfort
- Flatulence and abdominal bloating
- Functional dyspepsia
- Poor appetite associated with minor digestive issues

### MECHANISM OF ACTION

**CHIKOL** Drops exerts a synergistic effect through a unique blend of herbal extracts, each contributing distinct gastrointestinal benefits that make the formulation highly effective in managing pediatric colic and digestive disturbances:

**Foeniculum vulgare (Fennel Extract):** Acts as a potent antispasmodic and carminative. It relaxes smooth muscles of the gastrointestinal tract, easing abdominal cramps and reducing bloating. Fennel also helps in expelling trapped gas, offering quick relief from flatulence and colic.

**Cuminum cyminum (Cumin Extract):** Enhances digestive function by stimulating the secretion of pancreatic enzymes. Cumin is known to improve appetite and alleviate mild indigestion by promoting better breakdown and assimilation of nutrients.

**Mentha piperita (Peppermint Extract):** Contains menthol, which has antispasmodic properties that relax intestinal smooth muscles. It also facilitates bile secretion, aiding in fat digestion and relieving gastrointestinal discomfort, particularly in cases of irritable bowel symptoms.

**Zingiber officinale (Ginger Extract):** Ginger improves gastric motility and accelerates gastric emptying. It helps reduce nausea and vomiting, while also supporting overall digestive efficiency through its prokinetic and anti-inflammatory actions.

**Ptychosperma ajowan (Ajwain Extract):** Exhibits strong antimicrobial and antiflatulent properties. It acts as a natural digestive stimulant, aiding in the breakdown of food and preventing microbial fermentation in the gut that leads to gas formation.

### SAFETY PROFILE

- Natural plant-based formulation
- Non-sedative and gentle on the stomach
- Free from alcohol and artificial colors

### INSTRUCTIONS:

Store at room temperature. Protect from sunlight, heat and moisture. Keep all medicines out of the reach of children. Shake well before use.

### PRESENTATION:

25ml dropper bottle

ہدایات: ۲۵ ڈگری سینٹی گریڈ سے کم درجہ حرارت پر رکھیں۔  
ڈھونپ اور گرمی سے بچائیں۔ بچوں کی پہنچ سے دور رکھیں۔
